

YOUR DONATION HAS A BIG IMPACT

You will help us:

- *Ensure our new site is as accessible as possible, including a new elevator with audio cues and lights*
- *Install wayfinding signage in multiple dialects, reflecting the diverse communities that we serve*
- *Offer a variety of styles and sizes of seating throughout our site, meeting client needs and putting comfort first*
- *Provide a space designated for displaying art created by our talented clients in Klinik's popular art therapy program*
- *Provide a cultural room, designed in consultation with community*
- *Create a training room specifically designed for youth and peer groups*
- *Offer clients the use of community computers, free Wi-Fi and phone access*
- *Much, much more*

WE NEED YOUR HELP

All donors for this campaign, unless requesting otherwise, will be recognized publicly in our annual report. Donors over \$5,000 will also be thanked at our campaign close event, on our website, through social media and through our quarterly newsletter. Donors over \$10,000 will include the above and, in addition, will receive recognition on a special appreciation wall in the new site. This wall will be a pivotal art piece in our new entryway.

The design stage is now complete, with construction slated to begin in early winter 2019. A 'go live date' is currently slated for spring 2020.

WORKING TOGETHER, WE CAN ENSURE OUR CLIENTS ARE RECEIVING QUALITY CARE, SUPPORT AND RESPECT IN THE BEST ENVIRONMENT POSSIBLE.

Klinik is receiving support from our partners at the Winnipeg Regional Health Authority to project manage this renovation, oversee construction and provide a small increase to our operating budget to support some of the expansion.

We have already achieved more than 80% of what we require to make our goal a reality. With your help we can reach 100%! No donation is too small.

OUR NEW HOME 167 SHERBROOK STREET

Help us expand our services and create an **INCLUSIVE AND ACCESSIBLE** space within the **WEST BROADWAY COMMUNITY!**

**3 GREAT ORGANIZATIONS
ONE BUILDING**

BARRIER-FREE WAITING ROOM 167 SHERBROOK ST

WHY A NEW HOME?

Klinic has reached maximum capacity in our current location; because of this, we experience challenges in providing efficient and effective services. The new site will offer increased mental health wellness groups, primary care, drop-in counselling and other group services to address community demand. The new location is centrally located in the West Broadway area, which is experiencing issues with youth homelessness and addiction, areas where Klinic can provide increased support and expertise. Currently we are often unable to take on new clients or offer new services due to space constraints. Our current (and future site) are often utilized by community partners and groups. A significant amount of our clients live with multiple disabilities and we are committed to increasing physical accessibility to our space.

OUR PARTNERS

Sexuality Education Resource Centre Manitoba MB (SERC) is a community-based, non-profit, pro-choice organization dedicated to promoting sexual health through education. SERC employs approximately 30 staff in offices located in Winnipeg and Brandon, providing education and supports around healthy sexuality, with a focus on young people, the school system and newcomer communities.

Manitoba Federation of Labour (MFL) Occupational Health Centre

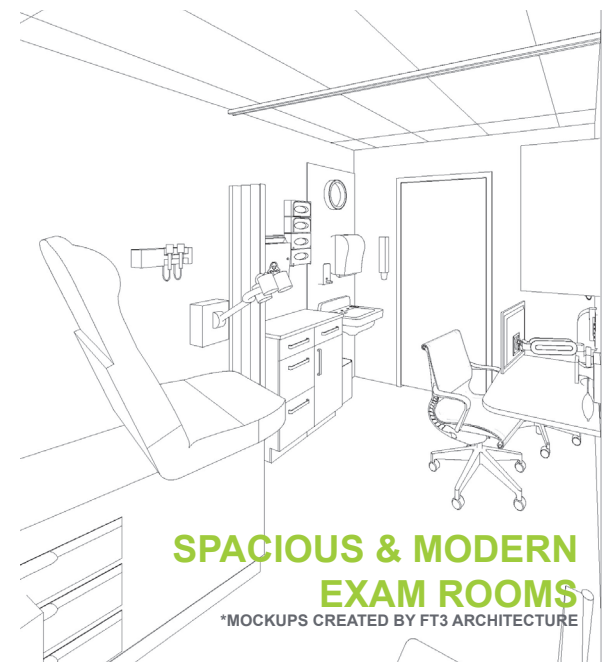

The MFL Occupational Health Centre is a non-profit community health centre that focuses on risks and injuries to workers. MFL provides injury assessment and health and safety training to workplaces and joint health and safety committees, aiming to make workplaces safer for workers through prevention and healing.

Klinic, SERC and MFL's services promote social inclusion. Accessible health and support services are key parts of supporting labour market participation.

OPPORTUNITY

Klinic's new home at 167 Sherbrook will allow us to consolidate our services and co-locate with our partners SERC and MFL. Our objective is to renovate the new site, ensuring an inclusive and accessible place within our community. Upon completion, we will be able to support expanded services in all three organizations, including:

- *Health and medical services for marginalized populations, particularly those living with disabilities, mental illness and/or addictions*
- *Drop-in, short term, and longer term counselling for marginalized populations, particularly those living with disabilities, mental illness and/or addictions*
- *Training and education for service providers on supporting people who are experiencing trauma and loss*
- *Wellness and mental health groups for people in our community of all abilities*
- *Inclusion-based sexual health education for educators, parents, newcomers, Indigenous communities and youth*
